Operations Building Automation (COBA)

Established is 2007, Aetos is a Certified Native American, Woman-Owned, 8(a), SDB; core capabilities relevant to Seaport-e included Information Systems Management/Network Support; Defense and consumer electronics applications. Our product and services experience includes (1) Electronic Support Measures and ELINT equipment, (2) Software Defined Radio and wireless networking; military communication systems; (3) high assurance cryptographic models, (4) Combat Net Radio (MIL-STD-188-220) software support, (5) military air-qualified Ethernet switch solutions, and (6) customer specific specialized military embedded hardware/software solutions. A detailed description of Aetos products and services can be found on www.aetos.com.

Advanced Performance Consulting Group, Inc

Aetos Systems’ focus is on supporting Federal agencies, the Department of Defense, and government organizations engaged in business transformation and mission-driven management. Below is a brief list of APCS services:

• Strategic planning and implementation
• Action planning and reengineering
• Program Management Office (PMO) support
• Supply chain optimization planning
• Business process reengineering
• Pay-for-performance program development and implementation
• Balanced scorecard framework development
• Performance-based enterprise architecture development
• Business intelligence and decision support
• Performance and budget integration
• Performance-based contract management and governance
• Risk, role, responsibility, accountability alignment
• Technology assimilation and accelerated implementation
• Change management strategy and implementation:
• Organizational assessment and change readiness assessment
• Stakeholder analysis, segmentation, and positioning
• Positioning and organizational identity
• Communications strategy, planning, and execution
• Strategic message development and management
• Executive briefing and content development

In support of NAVY Code 22, ASPT continues to offer all aspects of Configuration Management and Logistics Engineering support. ASPT performs configuration management functions for the SSN, DDG-51 and FFGX Surface Combatant Programs; Navy Surface Combatant Systems; Integrated Naval Medical Logistics Information Management Systems (IMLIS); Industrial Medicine Information Management Systems (IMIMS); and other Department of Defense (DoD) Wide Area Network (WAN) Information Technology (IT) Systems. ASPT provides configuration management services for software development, system engineering, and integration projects. ASPT is the single point of accountability for the configuration management and control of all DoD Wide Area Network (WAN) IT systems.

CloudNoxx Inc.

CloudNoxx, Inc. has been providing Software Engineering and IT Operations services to Federal agencies for 9 years. Our work in Agile Development, Modernization, and DevOps is driven by our cultural alignment and multidisciplinary teams. CloudNoxx has served time and money while for furthering the mission of agencies such as Homeland Security, GSA, DISA, and US Courts. We are a small business with a pending HUBZone certification until December 2014.

CLIENT SOLUTION ARCHITECTS LLC

Coalition Solutions Integrated, Inc.

Coalition Solutions Integrated (CSI) is a small woman-owned business focused on providing products and services to the Department of Defense (DoD) and the Department of State (DOS). CSI is headquartered in California, Maryland, and Idaho. CSI is a woman-owned business that has been approved by the USACE, DISA, MOSAIC, and NASA.

ComGlobal Systems, Inc.

ComGlobal Systems employs personnel with impressive backgrounds in engineering, design and development, finance, program management and administrative support. Technical skills include systems analysis, software engineering, test engineering, hardware engineering, field support and training. ComGlobal currently provides program support services to the Space and Naval Warfare Systems Command and the Naval Air Warfare Center, providing key team members, including the Lead Scientists, shipboard observers, veterinarians, and key personnel.

Colorkin Solutions, LLC

Colorkin Solutions is a government contracting firm with over 20 years of experience in the government contracting industry, and the U.S. Government. All our major contracts have been re-competed and retained at least once, and new customers and business opportunities have been developed as we have grown.

Commonwealth Center for High Performance Org

Commonwealth Center for High Performance Organizations is a leading CMMI®-Level 5 software development, systems integrator, and project manager for military mission systems; visual imagery processing, data programming and integration, real-time data and video fusion and pattern recognition, and project management.

Compass Systems, Inc.

Compass Systems is a leading CMMI®-Level 5 software development, systems integrator, and project manager for military mission systems; visual imagery processing, data programming and integration, real-time data and video fusion and pattern recognition, and project management.

Computer Sciences Corporation

Computer Sciences Corporation is a leading software development, systems integrator, and project manager for military mission systems; visual imagery processing, data programming and integration, real-time data and video fusion and pattern recognition, and project management.

Concert Technologies Corporation

Concert Technologies Corporation offers a wide range of software development, systems integration, and project management services in a variety of industries.

Constellation Software Corporation

Constellation Software Corporation offers a wide range of software development, systems integration, and project management services in a variety of industries.

Columbia Technologies, Inc.

Columbia Technologies is a provider of comprehensive, end-to-end solutions that enable customers to modernize, streamline, and enhance their operations. The company offers consulting, training, and technical support services to a variety of industries, including government, healthcare, and education.

Commonwealth of Virginia

Commonwealth of Virginia is a state of the United States. Its primary business sectors include Information Technology, Information Assurance, Engineering, Systems Engineering, Program Management, Project Management, Financial engineering, and Logistics Services. CBR enterprises are designed to provide the best in engineering and analysis expertise, as well as the historical knowledge to develop and provide technical solutions and program recommendations for the needs of our customers.

CPL TECHNOLOGIES, INC.

CPL Technologies is a Small Business Representative primary business sectors include Information Technology, Information Assurance, Engineering, Systems Engineering, Program Management, Project Management, Financial engineering, and Logistics Services.
CSA Ocean Science Inc. (CSA), founded in 1970 as an environmental consulting firm, specializes in multidisciplinary projects concerning potential environmental impacts on a wide variety of coastal and tidal wetland systems worldwide. CSA has extensive experience conducting multidisciplinary projects to evaluate potential impacts to the environment. Primary components of many of these projects involve environmental permitting and representing clients during all phases of the regulatory process. CSA staff are both trained and equipped to understand the science of natural and cultural resources, and the legal and political systems that are involved in developing ocean surveys and other activities in the costal and tideland legacy areas. CSA’s environmental permitting and regulatory consulting services are designed to incorporate biological impact and compliance monitoring, and to minimize the potential for fishing impacts to marine habitats, commercial and recreational species, and their habitats.
integration, system design and construction, operational assessment, operator training, and security program management. We also routinely work with the world’s best security specialty firms in areas such as protective services, technology research and development, and support services to implement full-service solutions for our clients.

Four STAR ASSOCIATES brings our clients the following credentials:

1. Comprehensive experience with all elements of maritime and border security technology focusing particularly on security for national assets such as oil platforms.
2. Leading force in development and implementation of model security procedures.
3. Expert knowledge of technical and operational requirements for successful deployment of security technology.
4. Ability to either supplement the port’s staff or provide a complete project delivery team, while ensuring minimal impact on port operations.
5. Ability to provide the strategic and tactical security capabilities available for implementation.

Four STAR ASSOCIATES implements security programs at major facilities worldwide, including:

- Off-shore platforms.
- Shallow and littoral waters worldwide.

U.S. Department of Defense facilities.

Gilbert Frank DuVal Jr. We offer experience in electrical engineering in the areas of power, RF and signaling in support of R&D, prototyping and system design.

Department of Defense and civil government agencies, first-tier systems integrators, original equipment manufacturers and other commercial enterprises. PFT develops, sells, and supports customized military and commercial software to defense organizations and the aerospace, energy, transportation, surveillance, manufacturing and electronics industries. We offer a software products and customized solutions in the areas of business operations, data management, analysis, and system design and operations to help customers manage their missions more efficiently and increase their effectiveness.

INCA Engineering delivers exceptional technical research and engineering services in support of research and development projects. INCA Engineering provides professionals with a deep understanding and practical knowledge of software defined systems, RF systems, and advanced technologies.

INNOLOG is a small, business that is currently providing Engineering and Technical Support to the Office of Naval Research (ONR), the Naval Research Laboratory (NRL), and the Program Executive Office for Integrated Warfare Systems (PEO IWS) to support the acquisition and development of Integrated Electronic Warfare (EW) systems and technology covering the spectrum of radio frequency (RF) to electro-optic/infrared (EO/IR) as well as radar/EW sensor fusion. In addition to our current role, we have also provided sensor integration and fusion engineering support to ONR, NRL, and DTRA. Our advanced technical knowledge of sensor fusion, systems engineering, and EW sensor fusion enables us to provide solutions that meet the complex needs of our warfighting customers.

Innovative Logistics Concepts Inc. (INCO) is a provider of comprehensive business solutions to the U.S. government and private sector organizations. INCO's services are designed to improve the efficiency and effectiveness of logistics operations, while reducing costs and increasing mission readiness.

Innovative Management Concepts (IMC) is a 24 year old Service Disabled Veteran Owned (SDVO) Small Business with experience providing support to the Office of the Chief of Naval Operations (OPNAV) sponsored programs such as: Integrated Topside (InTOP) Innovative Naval Prototype (INP), all three EAC programs (EAC I, II, and III) and Enhanced Nulka (Enulka) FNC programs. INNOLOG's subject matter experts have been called on by the ONR and NRL to provide technology and requirements. Keeping pace with adversary advancements and understanding underlying technology needs has been an essential element in our capability to support PEO IWS for our customers. Our core competencies include life cycle logistics support. This capability covers all aspects of logistics from the acquisition phase through production and deployment. Our logistics capability incorporates assessments of cost of program alternatives considering development, production, and in-service considerations.

Innovative Management Concepts, Inc (IMC) is a 28 year old Service Disabled Veteran Owned (SDVO) Small Business with experience providing support to DoD organizations including the Navy, USD(O), Army, Air Force, Combined Commands, the Joint Staff, defense agencies, and the Office of the Secretary of Defense. IMC provides the following types of support: R&D; Engineering; Software/Engineering; Development, Programming, and Networking Support; Systems Analysis; Modeling, Simulation, and Analysis; Prototyping; System Design; Technical Support; Configuration Management; Quality Assurance; and Program Management.

Innovative Products, Solutions, and Services (IPSS) is a growing business that provides program management, system design and analysis and policy guidance on R&D and technology implementation projects for the Federal Government in the areas of networking, communications, electronic warfare, special comms, tagging, tracking & locating, signal detection and cyber security. Services include system analysis, software engineering and evaluation, system engineering and design, technical readiness standards and policy development and IV&V.

Inscope Solutions, Inc. (Inscope) is a Certified Small Business and Gold Certified Microsoft Services Partner focused on the rapid deployment and adoption of Microsoft technologies. Our goals are to understand our clients’ objectives in terms of strategy, people, and processes. We deliver solutions that drive efficiencies and satisfy our clients objectives to quickly realize the value of their technology investments.

Inscope Solutions Inc/TrueTandem, LLC is a Certified Small Business and Gold Certified Microsoft Services Partner focused on the rapid deployment and adoption of Microsoft technologies. Our goals are to understand our clients’ objectives in terms of strategy, people, and processes. We deliver solutions that drive efficiencies and satisfy our clients objectives to quickly realize the value of their technology investments.

Intelligence, Surveillance, Target Acquisition, Reconnaissance (ISTAR) systems are a key component of modern military operations. ISTAR systems provide real-time situational awareness to commanders and troops, enabling them to make informed decisions and react quickly to changing battlefield conditions. These systems help to integrate various sensor information, such as radar, EO/IR, and communications, to provide a comprehensive view of the battlefield. The integration of diverse sensor data allows for more accurate target identification and tracking. ISTAR systems are critical for military decision-making, enabling commanders to plan and execute operations effectively. ISTAR technologies continue to evolve, incorporating advancements in sensor fusion, data analysis, and artificial intelligence. As military operations become more complex, the need for robust and adaptable ISTAR systems becomes even more critical. By leveraging advanced technologies, ISTAR systems contribute to the overall situational awareness and mission success of military forces.
ITa International, LLC

ITa International, LLC is an 8(a) Small Disadvantaged and a Service Disabled VeteranOwned Small Business specializing in providing detailed response organization for the Department of Homeland Security; and providing expertise in the cross functional Joint Capabilities Integration and Engineering (JCIE) functional areas of the SOW:

- Program Support
- Acquisition Logistics Support
- Engineering Support
- Human Factors, Performance and Usability

Our technical expertise includes: research and development, engineering development, Command and Control Systems as well as intelligence systems. We are a supplier of computer-based associated visual databases, avionics models, and Instructor/Operator Stations. ITa has extensive experience with Navy platforms and their integrated flight deck systems. We also provide program management support that includes metrics analysis, cost estimating, and procurement of systems/products. NAVAR is engineering solutions into hardware and software products, defining solutions to fluid identified needs, and developing training devices to augment operational readiness.

ITA International LLC

ITA International LLC has over 30 years experience working with the U.S. Navy and U.S. Marine Corp. ITA is also certified in both the SBA and Service-Disadvantaged Veteran-Owned Small Business programs.

Inso, Inc.

Inso Inc. specializes in:

- Computer Systems Design
- Database Management in Oracle, SQL, Sybase, DB2
- Network Management & System Administration
- Network Planning, Optimization and Development
- Test & Evaluation
- Wireless and Wi-Fi Application Development
- VDI and Remote Desktop Services
- Voice Over Wireless Communication
- Multi-media Solutions, Video Compression
- Business Applications design and development to include portals, Customer Management, E-procurement, Auction Sites, and Systems Integration.

Isensepro Inc.

In addition, Itri personnel have several years of experience in working with the U.S. Special Operations Command, and intimate knowledge of their requirements and acquisition processes, which will be critical to the success of some of the NAVY projects relating to this contract.

Ita International

ITA International, LLC is an 8(a) Small Disadvantaged and a Service Disabled Veteran-Owned Small Business specializing in providing detailed response organization for the Department of Homeland Security; and providing expertise in the cross functional Joint Capabilities Integration and Engineering (JCIE) functional areas of the SOW:

- Program Support
- Acquisition Logistics Support
- Engineering Support
- Human Factors, Performance and Usability

Our technical expertise includes: research and development, engineering development, Command and Control Systems as well as intelligence systems. NAVAR is engineering solutions into hardware and software products, defining solutions to fluid identified needs, and developing training devices to augment operational readiness.
### JTB Group, Inc.

- **Description:** Various aspects of program management support including financial management and NDE Helpdesk services in support of fleet modernization effort.

- **Contract:** PO under Program Management Support contract of Lockheed Martin.

- **Customer:** NAVSEA.

### Keyport Systems, Inc.

- **Services:** Workforce and Manpower Management Analysis Services, Training and Education Services, Professional Services, and Systems Engineering & Technical Assistance Services.

### Kingfisher Systems, Inc.

- **Services:** Naval Engineering, System Engineering and Process Engineering Support, and Systems Engineering & Technical Assistance Services.

- **Specialization:** Naval Engineering & Ship Design, systems engineering, and Technical Assistance.

- **Support Areas:** Systems Engineering, System Engineering and Process Engineering Support, and Systems Engineering & Technical Assistance Services.

### Knowledge Engineers, Inc.

- **Services:** Naval Engineering & Ship Design, Technical capability in all phases of naval ship design and support to government and commercial customers.

### Joint Tactics and Technologies, LLC

- **Services:** JTT is an experienced contractor in providing support to government and commercial customers in:
  - Naval Engineering & Ship Design
  - Systems Engineering & Technical Assistance
  - Training and Education Services
  - Professional Services

- **Technologies:** Includes Kingfisher Systems, Inc., and Joint Tactics and Technologies, LLC.
Knockquah, Inc.

Knockquah Inc has also worked closely with TITAN Corporation and Kros-Wise, Incorporated to provide a wide range of services.

Krans Technology & Training Solutions, Inc.

Krans Technology & Training Solutions, Inc. (KTT) is an experienced provider of training services, including classroom and online training, as well as technical and administrative support.

Kroger Corporation

Kroger Corporation is a leading food and drug retail company in the United States, providing a wide range of services to its customers, including grocery and drugstore retailing.

Laird Consulting

Laird Consulting is a leading provider of systems engineering, program management, and technical support services.

Lakota Technical Solutions, Inc.

Lakota Technical Solutions, Inc. (LTS) is a leading provider of technical and administrative support services, including systems engineering, program management, and technical documentation.

Liquidware Labs

Liquidware Labs is a leading provider of virtualization management solutions, offering a comprehensive suite of tools to manage and optimize virtual environments.

Lockheed Martin

Lockheed Martin is a leading defense contractor, providing a wide range of products and services to the U.S. government and international customers.

Lockheed Martin Integrated Systems, Inc.

Lockheed Martin Integrated Systems, Inc. provides a wide range of services, including systems engineering, program management, and technical documentation.

Lockheed Strategies

Lockheed Strategies is a leading provider of strategic advice and guidance, as well as business development and training services.

Logical Consulting Group

Logical Consulting Group is a leading provider of systems engineering, program management, and technical support services.

Logistics

Logistics is a leading provider of logistics solutions, offering a wide range of services to its customers, including transportation, warehousing, and supply chain management.

Logistics Support Incorporated

Logistics Support Incorporated is a leading provider of training and support services, offering a comprehensive suite of tools to manage and optimize logistics operations.
Metsim, Incorporated

Metsim works directly with government clients to provide analytical and technical solutions to solve complex problems in the development and fielding of next-generation solutions. Our mathematical modeling tools and techniques are used to provide insights into system-level trade-offs and to identify technical solutions.

Migration Technologies, Inc.

Migration Technologies specializes in the following areas:
- Network Management: Connectivity and network optimization
- Infrastructure Management: Data center design and deployment
- Business Process Management: Streamlining processes for improved efficiency
- Security: Physical and logical security measures
- Compliance: Regulatory and industry standards compliance

Mikkel, Inc.

Mikkel, Inc. is a small business that provides a variety of services to support government clients. Their areas of expertise include software development, system integration, and project management.

Milex

Milex is a small business that provides support services to government clients. Their areas of expertise include software development, system integration, and project management.

MIL Corporation, The

MIL Corporation is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

Mindbank Consulting Group, LLC

Mindbank Consulting Group is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

MITAGS

MITAGS is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

Mobile Intelligence Corporation

Mobile Intelligence Corporation is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

Morgan Business Consulting, LCC

Morgan Business Consulting is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

Morgan Management & Technology Solutions, Inc.

Morgan Management & Technology Solutions is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

MorganFrank Corp

MorganFrank Corp is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

Morarity and Associates Consulting Corp.

Morarity and Associates Consulting Corp. is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

MSOL, Inc.

MSOL, Inc. is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

M-Squared Solutions, Inc.

M-Squared Solutions is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

M-Techica, Inc.

M-Techica, Inc. is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

MVMCI, LLC

MVMCI, LLC is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

Nakurou Solutions LLC

Nakurou Solutions LLC is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

Nelson Kunes, Inc.

Nelson Kunes, Inc. is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

Naveen Applied Sciences

Naveen Applied Sciences is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

NEC Engineering

NEC Engineering is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.

NetCentric Technologies, Inc.

NetCentric Technologies is a leading provider of engineering and technical services. They offer services in a variety of areas, including software development, system integration, and project management.
Qualcomm

Qualcomm Incorporated provides advanced networking (such as Qualcomm Snapdragon) to the service provider and the end user (private and public) in the evolution of telecommunications services and devices.

We added and modified Qualcomm’s commercial products to provide opportunities for the government.

For 3G/4G/LTE-A software development and software engineering.

In 2016, Qualcomm introduced software development and reliability testing to its list of services.

Qualcomm Government Technologies (QGOV), a business unit of Qualcomm Technologies, Inc (QTI). serves as the federal and state government portal to Qualcomm technologies and services.

Vigilant Cyber Systems, Inc.

Visatech Business Consulting Inc

Visar, LLC

Visit offers comprehensive expertise in the areas of Planning / Planning Processes, Decision-Making Context / Contingency Planning, and Information Architecture. Our subject matter experts support planning by assisting in identifying and developing purpose-driven activities, specific and relevant goals, as well as measurable objectives. Additional, we assist in trend and fact analysis, and risk and process analysis that determine effective integration throughout plans, performance, and requirements. We assist in developing scenarios that anticipate upcoming challenges and enable pre-determined decisions that are automatic or decisions that must be fully integrated before executing actions. We assist in identifying appropriate ways of applying modeling and simulation to enhance efficient resource allocation decisions. Finally, Visitar experts assist in model development, and understanding information architecture based on organizational requirements.

Visionary Cyber Consulting

Visa Consulting is a small science and technology consulting firm that advises its clients on investments into and applications of science and technology innovations. Visa Consulting provides scientific assessment, technology evaluation, program development and assessment, policy support, and test planning for Government clients. Visa Consulting also helps fund academic lab research, small technology companies and government programs.
VisualCue Technologies, LLC

VisualCue delivers an intuitive approach to data comprehension by utilizing intuitive, icon-based, visual displays that enable the human eye to quickly extract, understand, and share insights from large volumes of complex data. This speed and ease of understanding reduces the time required to absorb complex data and allows decision-makers to focus on the underlying insights and actionable information.

VisualCue is a “presentation layer” of high volume data transactions using multi-layered graphical icons. It provides a visual-based tool to investigators and auditors of the Inspector General to identify patterns, trends and anomalies that may indicate fraud, waste and abuse. Visual tracking monitors over 150,000 transactions per week.

VisualCue Technologies, LLC

Voss Scientific LLC

Voss Scientific offers RAD support in the fields of computational physics, turn-key data acquisition software and systems, electromagnetics, and radar technology for the US Army, Navy, and DoD.
