If your iOS Device is corporate owned it is a part of the BAH Device Enrollment Program (DEP). To migrate from MaaS360 to Intune, you will need to use the OnBoarder Tool. The Onboarder link will be emailed, and **you must open the tool on your iOS device.**

a. Open the OnBoarder email from your iOS device and select the ‘Start Migration’ button.

b. You will be redirected to Safari. Select ‘Start Migration’

c. Wait for the process to complete.

d. Once complete, follow the link to the App Store to install the Intune Company Portal.
e. RSA Token app for iOS – when you un-enroll from MaaS360 from your iOS device, confirm that you still have the RSA installed and configured.

There’s a possibility that it was removed when you un-enrolled from MaaS360. If you need to reconfigure the RSA app, please call the Help Desk.

f. Removing MaaS360 will also remove the mobilewifi profile from your device. You will need to connect to another wifi network if your device is wifi-only.

Continue to next page for Intune enrollment.

1. Install the ‘Microsoft Intune Company Portal’ app from the Apple App Store.
2. Open the Company Portal app and enter your username. ‘EMPID@bah.com’ then press Next.

3. Enter your login credentials; EMPID@bah.com and BAH Passphrase. Press Sign in.

4. You will need to select a 2FA method. SMS or RSA PIN+Token. Complete 2FA to continue enrollment.

*go to https://mfa.bah.com/MFA/ to setup SMS verification.

5. Select ‘Begin’ to continue.
7. Select Continue.

Why enroll your device?

When enrolled, you’ll be able to:

- Access the company’s network
- Get company apps from the Company Portal
- Remotely reset your phone to factory settings if it is lost or stolen
- Automatically configure your company email account

More about enrolling your device

8. Select Enroll.

What comes next?

When you tap Enroll, your device will ask you to do the following:

- Install the Management Profile
- Trust the remote management source

For certain corporate devices, you may instead be asked to verify the Serial Number.

If you want to enroll, it’s safe to take these actions.

More about enrolling your device

6. Select Continue.

9. Select Install, then again Install on pop up.
10. Select Install.

11. Select Trust on the pop up, then Done when prompted.

12. Select ‘Open’ when prompted.

Installing this profile will allow the administrator at "https://i.manage.microsoft.com/DeviceGatewayProxy/jshandler.aspx" to remotely manage your iPhone.

The administrator may collect personal data, add/ remove accounts and restrictions, list, install, and manage apps, and remotely erase data on your iPhone.
13. Select device category. BYOD is for a personal device. Corporate is for firm owned devices.

14. Select Continue.

15. Select Continue, then Done.

16. Congratulations! Your device is now enrolled with Intune.
17. Use the Company Portal to install public and BAH apps.

18. For BAH Email access you will need to install the Outlook mobile app. Available in the Company Portal or the Apple App Store.

19. After selecting Install, you will receive a pop-up to confirm. Select Install.

20. You can enable contacts sync in the Outlook app.
