1. Open the Settings App and select General.

2. Select Device Management.

3. Select MaaS360 MDM Profile.

4. Select ‘Remove Management’
5. Enter your device PIN.

6. Confirm the Remove Management command.

7. The MDM profile will be deleted; as well as BAH Apps, App Catalog, and BAH Exchange account.

8. If you currently use the RSA Software Token App on your iOS device – confirm you still have the RSA app installed after un-enrolling from Maas360. If the RSA app was removed, please contact the Help Desk.

   If you currently use the RSA SecurID Hard Token, you can skip this step.

9. Removing MaaS360 will also remove the mobilewifi profile from your device. You will need to connect to another wifi network if your device is wifi-only.
